DETAILED ACTION

This is a first office action for serial number 10/064989, entitled Simulated Exposed Roof Rafter End, filed on September 6, 2002.

Election/Restrictions

This application contains claims directed to the following patentably distinct species of the claimed invention:

Group 1: Figures 1-8;

Group 2: Figures 9; and,

Group 3: Figures 10-21.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, none of the claims are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims

Art Unit: 3635

are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Response to Restriction Requirement

During a telephone conversation with Mr. Mike Kelley on 3/6/03 a provisional election was made with traverse to prosecute the invention of the species of group 1, figures 1-8, and stated that claims 1-6 and 16-21 are readable on the elected species. Affirmation of this election must be made by applicant in replying to this Office action. Claims 7-15 and 22-38 are withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 3, 4, 16, 18 and 19 are rejected under 35 U.S.C. 102(b) as being anticipated by Sanchez, US patent # 4,866,901.

Sanchez discloses the claimed invention a roof rafter end comprising a sleeve portion (16) and a mounting portion (12), a distal end (19) with an architectural design (Figure 2); and the mounting portion is a block of wood (column 2, lines 33-35); and the block of wood is a rafter end (13).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 5, 6, 20 and 21 are rejected under 35 U.S.C. 103(a) as being unpatentable over Sanchez.

Sanchez discloses the claimed invention as stated above in claims 1 and 16, except for the sleeve portion comprises a top and bottom wall and a pair of spaced-apart side walls. It would have been obvious to one having ordinary skill in the art at the time the invention was made to provide the sleeve portion with a top and bottom wall and a pair of spaced-apart side walls, although the sleeve of Sanchez is circular, the sleeve can obviously be changed based on the shape of the device to be covered. A change in shape of a prior art device is a design consideration within the skill of the art.

Allowable Subject Matter

Claims 2 and 17 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The following is a statement of reasons for the indication of allowable subject matter: prior art does not disclose a simulated roof rafter end comprising a mounting portion that is a frame in combination with a sleeve portion that is slidable onto the mounting portion.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Christy M Green whose telephone number is 703-308-9693. The examiner can normally be reached on M-F 8:00-4:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Carl Friedman can be reached on 703-308-0839. The fax phone numbers for the organization where this application or proceeding is assigned are 703-872-9326 for regular communications and 703-872-9327 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703-308-1113.
